WHEN YOU NEED TO TALK

Enhancing Guest Experiences: Innovative Communication and Security Solutions for the Hospitality & Lodging Industry

In the Hospitality portfolio, telecommunication products are essential for enhancing guest experiences. Products offered in this Vertical include for example phone systems and high-speed internet connectivity, catering to the diverse communication needs of guests and staff. High-speed internet connectivity is crucial for business travelers and tourists alike, supporting online bookings, communication, and entertainment services. Additionally, telecommunication products in the Hospitality Vertical include security measures, such as CCTV solutions and radios to ensure fluid communication between staff to ensure a flawless guest experience.

WAVE PTX: Streamlining Guest Communication

WAVE PTX is a subscription-based group communication service that seamlessly connects your hotel staff across different devices, networks, and locations, instantly enabling professional radio PTT communication with the ability to share details via text, photo, video, or file attachment. This broadband push-to-talk service extends the reach of your professional radio system, allowing you to connect more team members over a wider service area, ensuring seamless communication and coordination throughout your hotel premises.

With WAVE PTX, your hotel can enjoy predictable costs, as it eliminates usage-based call charges, making it easier to manage your budget. Push-to-Talk over Cellular (POC) solutions offer significant benefits to the hospitality industry by improving team communication, enhancing collaboration, and ensuring staff safety. These solutions can be applied in various scenarios like emergency response, guest management, and housekeeping operations to streamline communication and support coordinated efforts. Integration with other Motorola Solutions technologies further enhances communication capabilities, creating a solid communication ecosystem for your hotel to operate efficiently, effectively, and deliver an exceptional guest experience.

MOTOROLA SOLUTIONS

Streamline Your Communication with Motorola's TLK Series

In the fast-paced world, effective communication is crucial for seamless operations and exceptional guest experiences. Motorola's TLK 100, 110, 150, and TLK 25 Wi-Fi solutions are designed to streamline your communication, ensuring that your team stays connected and productive. The TLK 100, 110, and 150 radios offer reliable, push-to-talk (PTT) communication over LTE networks, providing clear and instant voice communication for your staff. The TLK 25 Wi-Fi solution provides a reliable and secure Wi-Fi network for your guests, ensuring they stay connected and entertained throughout their stay.

Upgrade your communication and connectivity with Motorola's TLK 100, 110, 150, and TLK 25 Wi-Fi solutions and experience the benefits of improved efficiency, enhanced guest satisfaction, and increased revenue.

WAVE PTX Dispatch

CENTRALISED COMMUNICATIONS ANYWHERE

Motorola's WAVE PTX Dispatch simplifies day-to-day operations by providing centralised communications from any internet-enabled location. The cloud-based solution frees you from maintenance and software updates, allowing secure sign-in from anywhere. Stay in instant communication with your field personnel using push-to-talk, monitoring traffic and connecting with groups or individuals at the touch of a button. Integrated messaging capabilities let you share text, photos, videos and files to keep your team informed and improve coordination. Leverage the location tracking and mapping features to visualise your team's position and optimise your operations. Streamline your communication and boost productivity with the powerful Motorola WAVE PTX Dispatch solution.

Experience Unmatched Connectivity

Evolve LTE handheld device combines the ruggedness of a two-way radio with the versatility of an Android smartphone, offering seamless connectivity across 3G, 4G, and Wi-Fi networks. With features like a glove-operable 5" touch screen, noise suppression microphones, and dedicated PTT and emergency buttons, this IP68-rated device ensures reliable communication in any environment.

The Evolve LTE's Android platform with an open app ecosystem provides a familiar user experience, making it easy to adapt to and integrate with existing systems. Whether you need to communicate in the loudest environments or make informed decisions on the fly, the Evolve LTE is your ideal companion for staying connected and productive.

Redefining Communication in Challenging Environments

RugGears RG540 is an exceptional rugged IT device designed to revolutionise communication in any industry. This device excels in Mission Critical Communication, offering robust and dependable connectivity essential for seamless hotel operations, even in the most challenging environments. Featuring Push-to-Talk Over Cellular (POC) capability, the RG540 empowers hotel staff to communicate swiftly and efficiently with a simple touch of a button, ensuring seamless coordination and responsiveness to guest needs.

KEY FEATURES
» *Rugged Design: Built to withstand challenging hospitality environments.*
» *Mission Critical Communication: Robust connectivity for seamless hotel operations.*
» *Push-to-Talk Over Cellular (POC): Enables efficient communication with a touch of a button.*
» *Reliable Connectivity: Ensures seamless coordination and guest responsiveness.*

Rugged Devices made for Difficult Terrain

Telox TE300K is another POC device engineered to deliver reliable and seamless connectivity. This solution is the perfect companion for hotel staff, empowering them to provide exceptional service and respond swiftly to guest needs. Boasting long-range connectivity and a high-capacity battery, the TE300K is built to thrive in the demanding hospitality environment, offering rugged durability and a user-friendly interface to elevate your hotel's communication capabilities and operational efficiency.

KEY FEATURES
» *Reliable Connectivity: Seamless communication for hotel staff.*
» *Long-Range Capability: Extended coverage in challenging environments.*
» *High-Capacity Battery: Reliable power for continuous use.*
» *Rugged Durability: Withstands hospitality industry demands.*
» *User-Friendly Interface: Easy operation for efficient communication.*
» *Enhanced Service: Empowers staff to respond swiftly to guest needs.*

TRBOnet Control Room:
Empower Guest Experience

Experience TRBOnet Control Room, a cutting-edge solution designed to revolutionise the hospitality industry. Transform your hotel operations by incorporating advanced communication technologies to boost guest satisfaction, staff efficiency, and overall coordination in crucial situations. This innovative system provides seamless monitoring capabilities, allowing for continuous surveillance of hotel premises and immediate responses to alerts, ensuring maximum security and peace of mind for guests and staff alike.

Staffed by a team of skilled professionals, TRBOnet Control Room offers 24/7 support and rapid emergency responses, making it an essential tool for hoteliers looking to stay ahead in a competitive market. With functionalities like movement detection, call logging, and staff monitoring, TRBOnet Control Room delivers a comprehensive solution to streamline communication, enhance safety protocols, and optimise operational efficiency across all aspects of hotel management. Elevate your guest experience and operational excellence with TRBOnet Control Room, the cutting-edge solution designed to propel your hotel to new heights of success.

Keep an eye out, for both guest and employee

Avigilon is a leading provider of end-to-end video security and access control solutions. Their comprehensive suite integrates video security and access control under a single platform, offering both cloud-native and on-premise solutions to cater to diverse needs.

Avigilon offers several specific camera models well-suited for the hospitality and lodging industry:

Avigilon H4 Pro Camera Line: This line includes high-resolution cameras with up to 4K resolution and advanced video analytics. The H4 Pro cameras are ideal for monitoring large areas like hotel lobbies, conference rooms, and parking lots.
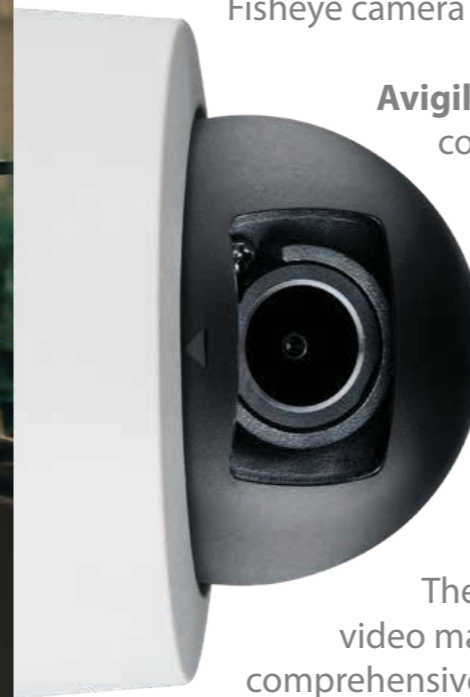

Avigilon H4 SL Camera Line: The H4 SL cameras are designed to be discreet and unobtrusive, making them suitable for use in hotels and resorts. These cameras offer up to 5MP resolution and include advanced analytics features.

Avigilon H4 Fisheye Camera: This camera provides 360-degree coverage and is well-suited for monitoring hallways, elevators, and other confined spaces in hotels. The H4 Fisheye camera offers up to 12MP resolution and includes built-in video analytics.

Avigilon H4 Multisensor Camera: The H4 Multisensor camera combines multiple camera sensors into a single unit, allowing for wide area coverage with fewer devices. This makes it ideal for monitoring large hotel properties and resorts.

Avigilon H4 IR PTZ Camera: This camera offers pan-tilt-zoom functionality and advanced infrared illumination, making it suitable for monitoring outdoor areas of hotels and resorts, such as parking lots and perimeters, even in low-light conditions.

These Avigilon camera models, combined with the company's video management software and access control solutions, provide a comprehensive security system tailored to the needs of the hospitality and lodging industry.

AVIGILON UNITY

Brighten up Your Hospitality with Goal Zero's Reliable Power Solutions

Elevate your hospitality experience with Goal Zero's power solutions and lighting systems. Designed to provide reliable, eco-friendly energy, our products are perfect for hotels, resorts, and other hospitality establishments looking to enhance their guests' comfort and convenience. From our robust Power Solutions to our versatile Light series, we offer a range of innovative products that seamlessly integrate into your hospitality setting, ensuring a memorable stay for your guests.

VERSATILE ILLUMINATION ANYWHERE

Lighthouse 600 is a reliable lighting solution, offering adjustable illumination with its powerful 600-lumen LED light. It features a rechargeable 5200 mAh lithium battery that can charge devices via USB and can be recharged from a USB port, solar panels, or the built-in hand crank. Designed for convenience, the Lighthouse 600 has collapsible legs for stable light dispersion and a handle for easy carrying and hanging. Its rugged, waterproof construction makes it suitable for both indoor and outdoor use, ensuring reliable illumination in any hospitality setting.

PORTABLE POWER SOLUTIONS EVERYWHERE

Goal Zero's portable power stations, like the Yeti 200X, 400, and 1500X, provide a reliable and convenient charging solution for hospitality establishments. These compact power stations can be placed throughout your venue, offering multiple USB ports and AC outlets to charge devices simultaneously.

Perfect for restaurants, hotels, and other settings, they can be recharged using solar panels like the Boulder 100 or Nomad 50, making them an eco-friendly choice for your business.

GOALZERO.

Improve Guest Experience: Reliable WiFi for Lodging

Cambium Networks

In the hospitality industry, where guest satisfaction is the key to success, Cambium Networks' cnPilot E410 and E600 access points are the perfect solution to elevate your Wi-Fi connectivity. These powerful and reliable devices are designed to provide seamless, high-speed internet access to your guests, ensuring that they can stay connected and entertained throughout their stay.

The cnPilot E410 and E600 boast advanced features such as dual-band Wi-Fi, beamforming technology, and MU-MIMO support, delivering lightning-fast speeds and reliable coverage even in high-density environments. With their sleek and discreet design, these access points blend seamlessly into your hotel's decor, providing unobtrusive connectivity without compromising on aesthetics. Cambium Networks' cnPilot series is built to withstand the rigors of daily use, offering robust construction and enterprise-grade security features to protect your guests' data. Invest in the future of your hotel's connectivity and give your guests the ultimate Wi-Fi experience with the cnPilot E410 and E600.

Cambium offers outdoor-rated access points to extend reliable Wi-Fi coverage to outdoor areas of hospitality properties, such as pools, patios and gardens.

A POWERFULL NETWORK MANAGEMENT SYSTEM

Cambium CnMaestro is the premier network management system designed to revolutionise the hospitality industry, offering centralised control and monitoring of Cambium Networks devices to streamline configuration, monitoring, and troubleshooting. With real-time visibility and proactive monitoring, CnMaestro empowers hoteliers to provide an unparalleled guest experience by ensuring seamless connectivity and reliable performance, enabling them to anticipate and address potential issues before they impact satisfaction, while optimising network performance and efficiency to focus on delivering exceptional service, making it the essential platform for elevating guest experience in hospitality.
