

# MOTOTRBO ION

Motorola Solutions has just launched their first business-ready communication device with combined voice and broadband capabilities.

MOTOTRBO ION is the first business-ready communication device with all-on-voice and broadband data capabilities. It brings together renowned PTT performance, an open app ecosystem on the Android platform, and access to Motorola's unified technology ecosystem — from video security and analytics solutions, to best-in-class network security, to powerful new software and technology services like smart virtual assistants.

With MOTOTRBO ION, teams stay connected across networks and devices. Business-critical data and workflows are unified and simplified. And the capabilities your workforce needs to be at their best are always on.

## Your APPS are always ON

An intuitive touchscreen lets you view high resolution images, and an integrated camera lets you send and even stream photos and videos. With MOTOTRBO Ion, the apps your enterprise needs like ticketing, scanning, searching,

are always ON at all times. Plus, ION gives you access to Motorola's unified technology ecosystem, and advanced capabilities, like smart virtual assistants and location apps.

## Clear and ease of use in any environment

Be heard and be heard when it matters most. Ultra-strong materials including a ruggedized keypad and a reinforced screen are built out for outstanding impact resilience. UI, design, and engineering all come together to make it easy to work when you need it.

## Always connected, no matter where they are

Stay connected through voice and data, over public and private networks. And Seamless Voice lets you switch from voice to broadband when you roam beyond your radio system coverage, so your users can do what you need it.

## Keep them in the field longer

With remote configuration and provisioning, remote updates, and real-time device monitoring, you can deploy and manage devices with minimal touch and downtime. So your IT team can spend less time managing devices, and more time on-point and on-task.

## Helps you stay safe from cyber threats

A defense-in-depth approach provides multiple layers of security to help prevent unauthorized device access and malicious activity, and to safeguard your critical data. With the highest level of device and network security, combined with real-time threat monitoring, ION lets you use data and Android apps with confidence, even on public networks.
