

MOTOTRBO ION GO ALL ON

MOTOTRBO ION

launched their first business-ready communication device with combined voice and

business-ready communication device with all-on voice and broadband data capabilities. It offers high performance, an open app ecosystem on the Android platform, and access to Motorola's unified technology ecosystem — from video security and analytics solutions, to best-in-class network security, to cloud-based technology services like smart virtual assistants.

Seamlessly connected across networks and devices. Business-critical data and workflows are always on. Capabilities your workforce needs to be at their best are always on.

View high resolution images, and an integrated camera lets you send and even stream images. On ION, the apps your enterprise needs like ticketing, scanning, searching, and more are always on. Plus, ION gives you access to Motorola's unified technology ecosystem, and capabilities, like smart virtual assistants and location apps.

Accept cookies

and ease of use in any environment

Pristine audio quality lets you hear and be heard when it matters most. Ultra-strong materials including a rugged touchscreen are used inside and out for outstanding impact resilience. UI, design, and engineering all come together to create a device you can depend on to work when you need it.

Built to keep your workforce connected, no matter where they are

You can seamlessly communicate through voice and data, over public and private networks. And Seamless Voice Handover automatically switches you to broadband when you roam beyond your radio system coverage, so your connectivity is always on when you need it.

Deploy your radios faster and keep them in the field longer

With cloud-based configuration and provisioning, remote updates, and real-time device monitoring, you can deploy and maintain your radio fleet with minimal touch and downtime. So your IT team can spend less time managing devices, and your workforce can spend more time on-point and on-task.

Helps you stay safe from cyber threats

A defense-in-depth approach provides multiple layers of security to help prevent unauthorized device access and malicious activity, and to safeguard your critical data. With the highest level of device and network security, combined with real-time threat monitoring, ION lets you use data and Android apps with confidence, even on public networks.
