KEY FEATURES

Analogue/Digital - Get all the benefits of digital, including better voice quality, better range and better battery life – but retain compatibility with your existing radio fleet while giving yourself the freedom to migrate to the latest technology at your own pace.

Automatic Gain Control - Automatically compensates for changes in voice level, whether you are speaking softly or loudly, turning your head, or moving the microphone further away from your mouth.

Transmit Interrupt Capability - Enables a supervisor to interrupt a DP1400 user to deliver critical communication exactly when and where it's needed.

Compatible with Radio Management Suite - Program your radios quickly and efficiently, with Motorola Solutions Radio Management tool. Radios can be programmed in batches to a standardised template, giving error-free results and optimised performance.

Dual Capacity Direct Mode - Utilise the power of the 2-slot TDMA DMR standard to increase calling capacity and minimise licensing costs.

Encrypted Communications - Keep your communications from being intercepted and your channels secure with 16-bit encryption.

Lone Worker - DP1400 can help protect those working on their own by regularly prompting the user to press a button on the radio. If the user does not respond within a specified length of time, a supervisor or dispatcher is notified that there may be a problem.

IP54 Rated - Dustproof and splashproof, so you can work with confidence in challenging environments.
