Key features

Numeric Display - Clear, simple display of channel number.

Analogue/Digital - Get all the benefits of digital, including better voice quality, better range and better battery life—but retain compatibility with your existing radio fleet. With analogue and digital capability, you have the freedom to migrate to the latest technology at your own pace.

Analogue only - Purchase analogue capability now and transition to digital capability when you're ready. All you will need is a simple software upgrade.

Transmit Interrupt Capability (decode only) - Enables a supervisor to interrupt a DM1400 conversation to deliver critical communication exactly when and where it's needed.

Compatible with Radio Management Suite - Programme your radios quickly and efficiently, with the Radio

Management tool. Radios can be programmed in batches to a standardized template, giving error-free results and optimized performance.

Dual Capacity Direct Mode - Utilize the power of the 2-slot TDMA DMR Standard to double the capacity of your 12.5 kHz channel—without the need for a repeater.

IP54 Rated - Dustproof and splashproof, so you can work with confidence in challenging environments
