SHOW MORE

Connected

The MOTOTRBO DP400e Series is a family of ETSI DMR Standards compliant digital radios that delivers operation-critical voice and data communications. Bluetooth® audio lets you talk without wires, integrated Wi-Fi® enables remote software upgrades and indoor and outdoor location- tracking capabilities give you total visibility of your resources. With support for trunking as well as legacy analogue technology, you can keep your

organisation connected as it grows.

Productive

Text messaging and Work Order Ticketing simplify complex communications, and data capabilities support advanced applications. Featuring a powerful audio amplifier, these radios deliver loud, clear speech, with industrial noise cancellation for better intelligibility. The latest energy technology delivers up to 28 hours of battery life for 3-shift working, and an improved receiver boosts range by up to 8%.

Safe

Safeguard your staff with responsive push-to-talk technology. The prominent orange emergency button on DP4000e Series radios summons help with one touch, using Transmit Interrupt to clear a channel when necessary. An integrated accelerometer senses if you've fallen and can automatically call for assistance (DP4401e, DP4601e, DP4801e). The radio is tested to tough military standards and is waterproof to IP68. It won't let you down.
