GOVERNMENT & PUBLIC SAFETY - COMMUNICATION SOLUTIONS

From two-way radio users at fire departments and police to advanced nationwide infrastructures. Danimex Communication has the experience and is ready to assist with equipment and solutions.

Governments and national authorities have many challenges. For example, the demining programmes that have been initiated in many of the world's former hot-spots have called for special communication solutions. Danimex Communication has worked closely together with mine-clearing companies and organisations across the world.

Simple Solutions

Protection of the environment is another challenge. Areas like wildlife preservation, environmental control and maritime inspections are all dependent on communication. And the solutions can be very simple - sometimes a simple HF radio system is all it takes to keep a wildlife reserve closely monitored and ensure the personnel's safety.
